

# What if you could protect your family from catching COVID-19 at home?

The SCORPIO-PEP study is being done to learn whether an oral investigational medicine, S-217622, can prevent COVID-19 in those exposed to it.

There are two types of individuals who can join:

**Index patients** are those with COVID-19 who:

- Are children or adults of any age
- Are the first case of COVID-19 in the household
- Have at least 1 COVID-19 symptom within 24 hours of providing consent
- Have a positive COVID-19 test

**Participants** are those who live in the same household as someone with COVID-19 and who:

- Are 12 years of age or older
- Have a negative COVID-19 test
- Agree to join the study within 72 hours from the beginning of COVID-19 symptoms in the index patient
- Are willing to complete a patient diary

Talk to your doctor for more information about the study or visit [www.scorpiopep.com](http://www.scorpiopep.com)
